

5. (Amended) The curable resin composition according to Claim 1 or 2

wherein the reactive silicon group-containing polyether oligomer (I) is obtainable by reacting  
(a) a polyether oligomer the main chain of which comprises a polyether and which contains at least one unsaturated group represented by the general formula (2) :

wherein  $\text{R}^3$  represents a hydrocarbon group containing up to 10 carbon atoms and  $\text{R}^4$  represents a divalent organic group containing 1 to 20 carbon atoms and at least one member selected from the group consisting of hydrogen, oxygen and nitrogen as a constituent atom

or the general formula (3) :

wherein  $\text{R}^3$  and  $\text{R}^4$  are as defined above

per molecule

with a reactive silicon group-containing compound (b)

in the presence of a group VIII transition metal catalyst(c) .

7. (Amended) The curable resin composition according to Claim 5

wherein  $\text{R}^3$  in the general formula (2) or (3) represents  $-\text{CH}_3$  or  $-\text{CH}_2\text{CH}_3$ .

10. (Amended) The curable resin composition according to Claim 1 or 2

wherein the reactive silicon group-containing polyether oligomer (I) has a number average molecular weight of not less than 10,000.

11. (Amended) A direct-glazing method for directly equipping a vehicle with glass using a sealant

wherein the curable resin composition according to Claim 1 or 2 is used as said sealant.
